SUMMARY

AI Product Engineer and AI Engineer at PCUBE Solution with a strong foundation in full-stack development and AI integration. Proven track record in building scalable business automation and online reputation management (ORM) platforms. Adept at translating complex business requirements into production-ready software solutions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Malaviya National Institute Of Technology Jaipur

2021 – 2025

EXPERIENCE

AI Product Engineer
Pcube Solution

Jan 2026 – Present
Noida

- Leading the development of **Repux**, an AI-powered ORM and automation platform, managing customer engagement, sentiment workflows, and multi-channel lead pipelines.
- Engineered scalable backend systems and cross-platform apps (Android/iOS) integrating LLM APIs for automated response generation, data scraping, and business analytics.
- Collaborated directly with clients to translate business intelligence requirements into optimized, production-ready AI features, prioritizing UX and performance scalability.

Full Stack Developer Intern
Pcube Solution

Jul 2025 – Jan 2026
Noida

- Built and deployed custom e-commerce web applications processing 500+ daily orders, featuring responsive UIs, robust backend architectures, and secure checkout workflows.
- Implemented technical SEO, GEO, and frontend optimizations, significantly improving Core Web Vitals, page load speeds, and overall search visibility for client platforms.

PROJECTS

Repux – AI Reputation Management Platform
AI-powered ORM and business automation platform for monitoring reviews and customer engagement.

In Progress

- Built AI-assisted workflows for review analysis, sentiment classification, response generation, and business insights.
- Integrated automation systems for handling multi-platform customer interactions and lead management pipelines.
- Designed scalable frontend and backend architecture focused on user experience and business automation.

AI Trading Bot
Real-time AI-assisted trading and analytics platform with live market tracking and automated execution.

In Progress

- Developing AI-powered trading workflows with market analysis, automated signal generation, and risk management.
- Built live dashboards with real-time updates, analytics visualization, and strategy performance tracking.
- Implemented backend services for processing streaming market data and automated execution pipelines.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C/C++, SQL, HTML/CSS

Frameworks: React.js, Node.js, Express.js, Tailwind

AI & Automation: OpenAI APIs, Prompt Engineering, LLMs, AI Workflows

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Tools: Git, GitHub, VS Code, Postman, REST APIs

Soft Skills: Product Thinking, Problem Solving, Adaptability

Coursework: Data Structures & Algorithms, OS, DBMS, OOPs, Computer Networks, Software Engineering

ACHIEVEMENTS

JEE MAIN– Secured AIR 2063 out of over 1 Million Students

2021

Competitive Programming– Solved 1000+ coding problems across LeetCode, CodeChef, and GeeksForGeeks

2022 – 2025

POSITIONS OF RESPONSIBILITY

Lead Coordinator, MNIT Technical Fest

2023 – 2024

- Managed a large budget and a 30-member team to execute a 3-day event for 5,000+ attendees.
- Coordinated logistics and execution for multiple technical events and activities.
